// Goals

I want to develop a long-term career in the IT industry, and I am always eager to find an environment that is suitable for an internship to get acquainted with the field. To achieve these goals, I am committed to giving my best effort to contribute and work diligently.

// Projects

A movie ticket booking web app built with React, NestJS, and PostgreSQL. It supports browsing movies, selecting showtimes and seats, booking tickets, and secure login using JWT. The UI is responsive and optimized for user experience.

SocialConnect is a modern social media platform inspired by Facebook, developed using React for the frontend and Spring Boot for the backend REST APIs. It incorporates a Python-based machine learning model to detect and filter out toxic comments and posts in real-time, ensuring a safer and healthier user environment.
